

## **Independent Practitioner's Limited Assurance Report**

To the Management of ASAHI METALFINE, Inc.

**Report on** LPPM Responsible Platinum and Palladium Guidance Compliance Report

### **Conclusion**

We have performed a limited assurance engagement on whether ASAHI METALFINE, Inc. (the "Company")'s Compliance Report for the year ended 31 March 2025 has been prepared in accordance with the requirements of the LPPM Responsible Platinum/Palladium Guidance Version 4 (the "Criteria").

Based on the procedures performed and evidence obtained, nothing has come to our attention to cause us to believe that the Company's Compliance Report for the year ended 31 March 2025 does not describe fairly the activities undertaken during the year to demonstrate compliance, and the management's overall conclusion contained therein is not, in all material respects, in accordance with the Criteria.

### **Basis for conclusion**

We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board (IAASB) and the guidance set out in the LPPM Responsible Sourcing Programme - Third Party Audit Guidance (the "Audit Guidance"). Our responsibilities under these are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA).

Our firm applies International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, issued by the IAASB. This standard requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

### **Responsibilities for the Compliance Report**

Management of the Company are responsible for:

- designing, implementing and maintaining internal control relevant to the preparation of the Compliance Report that is free from material misstatement, whether due to fraud or error;
- selecting suitable criteria for preparing the Compliance Report and appropriately referring to the criteria used; and
- preparing the Compliance Report in accordance with the Criteria.

### **Inherent limitations in preparing the Compliance Report**

Non-financial information, such as that included in the Company's Compliance Report, is subject to more inherent limitations than financial information, given the more qualitative characteristics of the subject matter and the methods used for determining such information. The methods used by Refiners to comply with the Criteria may differ. It is important to read the Company's Responsible Precious Metals Management Policy available on the Company's website: [www.asahimetalfine.com/en/responsible-sourcing/](http://www.asahimetalfine.com/en/responsible-sourcing/).

## Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the Compliance Report is free from material misstatement, whether due to fraud or error;
- forming an independent conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to the management.

### Summary of the work we performed as the basis for our conclusion

We exercised professional judgment and maintained professional skepticism throughout the engagement. We designed and performed our procedures to obtain evidence about the Compliance Report that is sufficient and appropriate to provide a basis for our conclusion. Our procedures selected depended on our understanding of the Compliance Report and other engagement circumstances, and our consideration of areas where material misstatements are likely to arise. In carrying out our engagement, we:

- evaluated the suitability in the circumstances of the Company's use of the criteria for determining the compliance with each step;
- evaluated the appropriateness of the policies and procedures used by the Company;
- inquired the management to gain an understanding of the Company's processes and risk management protocols in place;
- inquired the relevant personnel of the Company responsible for the preparation of the Compliance Report;
- performed site visits at the Bando plant of the Company and the Amagasaki plant and another domestic operational site of Asahi Pretec Corp., which were determined through our risk assessment procedures;
- reviewed a selection of the supporting documentation, including Platinum/Palladium supplier counterparty due diligence file and transaction's documentation;
- tested a selection of the underlying processes and controls that support the information in the Compliance Report; and
- evaluated the overall presentation of the information presented in the Compliance Report.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Kazuhiko Saito, Engagement Partner

KPMG AZSA Sustainability Co., Ltd.

Tokyo Office, Japan

30 June 2025

## LPPM Responsible Platinum and Palladium Guidance Compliance Report

The LPPM Responsible Platinum and Palladium Guidance version 4 (the “LPPM Guidance”) have been established for Good Delivery Refiners to adopt high standards of due diligence in order to combat systematic or widespread abuses of human rights, to avoid contributing to conflict, to comply with high standards of anti-money laundering and combating terrorist financing practice.

This report summarizes how ASAHI METALFINE, Inc. together with Asahi Pretec Corp. has complied with the requirements of the LPPM Guidance.

### Table 1: Refiner’s details

Refiner’s name:	ASAHI METALFINE, Inc.
Location:	Sapia Tower 11F, 1-7-12 Marunouchi, Chiyoda-ku, Tokyo 100-0005, Japan
Reporting year-end:	March 31, 2025
Date of Report:	June 30, 2025

Senior management responsible for this report: Nobuo Tajima, Representative Director and President

Original Asahi Pretec had its Head Office in Tokyo and operated precious metal refining and manufacturing in Bando, Ibaraki for platinum and palladium. In addition, Asahi Pretec had the sales offices for collecting materials containing precious metals and the plants for treatment in Japan. Original Asahi Pretec was split into three entities effective from April 1, 2023. The environmental preservation business was transferred to Japan Waste Corporation, the precious metal refining, manufacturing and trading business were transferred to ASAHI METALFINE Inc, and the sales offices for collecting materials containing precious metals and the plants for treatment were succeeded by New Asahi Pretec. All entities are 100% owned by ARE Holdings Inc which is listed on the Tokyo Stock Exchange.

On April 1, 2023, ASAHI METALFINE succeeded refining and manufacturing business at Bando Plant for platinum and palladium as well as sales and trading business at Tokyo Head Office. The LPPM Good Delivery status for platinum and palladium was transferred to ASAHI METALFINE.

Asahi Pretec succeeded the sales offices for collecting materials containing precious metals and the plants for treatment in Nagano, Amagasaki, Ehime and Fukuoka. Asahi Pretec has its Head Office in Tokyo and operates collecting and pre-treatment of materials containing precious metals.

ASAHI METALFINE has its Head Office in Tokyo and operates precious metal refining and manufacturing of platinum and palladium at Bando Plant. ASAHI METALFINE has sourced the materials containing precious metals mainly through Asahi Pretec.

ASAHI METALFINE’s evaluation

### Table 2: Summary of activities to demonstrate compliance

#### [Step 1: Establish strong company management systems](#)

##### **Compliance Statement with Requirement:**

ASAHI METALFINE has fully complied with Step 1: Establish strong company management systems

##### **1.1. Adopt a company policy regarding due diligence for supply chains of platinum and palladium**

We have adopted our policy and procedures regarding due diligence for supply chain of precious metals,

which are consistent with the model set out in the Annex II of the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (the “OECD Guidance”).

In 2012, we completed and started applying the Basic Policy for Handling of Conflict Metal, which was based on our Code of Conduct “ARE Group Way”. In 2018, we revised our policy and renamed it the “Responsible Precious Metals Management Policy” (the “Policy”), and have made changes to the Policy regularly in response to the revisions to relevant industry guidance. The latest revision to the Policy was on March 1, 2024.

The Policy sets out our responsibility for promoting responsible precious metals management in the precious metals supply chain in order to avoid contributing to conflict, human rights abuses, money laundering, financing terrorists, corruption, fraudulent transactions, and non-compliance with environmental and sustainability legal requirements.

We make clear in the Policy that we will avoid the following OECD Annex II risk factors and ESG factors.

- Human rights abuses associated with the extraction, transport or trade of minerals
- Direct or indirect support to non-state armed groups
- Direct or indirect support to illegitimate public or private security forces
- Bribery and fraudulent misrepresentation of the origin of minerals
- Money laundering
- Non-compliance with taxes, fees and royalties due to governments
- Other risks that adversely affect sustainability including ESG factors (Environmental, Social, Governance)

The Policy is approved by senior management, and updated if necessary in response to the revisions to relevant industry guidance. The latest version of the policies of ASAHI METAL FINE and Asahi Pretec are available in English on the websites below. The policies are communicated by providing online training programs to all relevant employees for both ASAHI METAL FINE and Asahi Pretec.

For ASAHI METAL FINE (<https://www.asahimetalfine.com/en/responsible-sourcing/>)

For Asahi Pretec (<https://www.asahiprectec.com/responsible-sourcing/>)

## **1.2. Set up of an internal management structure to support supply chain due diligence**

We have set up an internal management system to support supply chain due diligence to define the governance, roles and responsibilities, internal review, communication and senior management review.

Senior management retains the ultimate control and responsibility over the precious metals supply chain. We have established the Responsible Precious Metals Management Committee (the “Committee”) composed of the Compliance Officer and experienced members. The Compliance Officer has been assigned by senior management to manage the process of due diligence and report directly to senior management. The Committee is responsible for an ongoing assessment, monitoring, and providing training to Board members and all relevant employees. The Business Division Manager is responsible for counterparty/supplier due diligence. The Plant Manager is responsible for traceability.

All due diligence processes are conducted by the Business Division (Sales team) and/or the Committee members, and the results are reviewed by the Compliance Officer and senior management. Asahi Pretec conducts its due diligence processes in the same manner as ASAHI METAL FINE.

Both ASAHI METAL FINE and Asahi Pretec have provided the following online training program for the reporting year.

- Internal regulatory update on our responsible precious metals management to Board members and all employees engaged in collecting, refining or producing of precious metals at Sales Offices, Plants, Business Divisions as of July 1, 2024, as well as all employees engaged in Administration Departments at Head Office.

We do not allow cash transaction for purchasing bullion and precious metal for recycling.

Asahi Pretec does not generally allow cash transaction for purchasing bullion and precious metal for recycling.

For bullion purchases of up to one million yen and dental scrap purchases, cash transactions are permitted on the condition that they have a rational reason and an in-advance-approval from the person delegated by senior management. Receipts from counterparty are required for all cash transactions.

For bullion purchases, all suppliers are required to submit identification documents. For cash transactions over one million JPY for dental scrap purchases, it is required to be provided a government-issued identification.

No due diligence issues were identified for the reporting year for both ASAHI METALFINE and Asahi Pretec.

### **1.3. Establish a strong internal system of due diligence, controls and transparency over platinum and palladium supply chain, including traceability and identification of other supply chain actors**

We source from only recycled precious metals supply chains. No mined precious metals supply chains are allowed. We source mainly industrial, jewelry and dental recycled materials.

Our traceability system has been well established on the grounds of our material receipt process and internal traceability program.

According to our material receipt process, inspection is performed whenever materials are received. After that, a unique identification number is assigned to each material. Those individual numbers with all material information verified after inspection are input into our internal traceability program. All individual numbers are traceable throughout the whole manufacturing process with record retained in our internal traceability program.

Each step of the process, starting from receiving at the Plant until the first destination of each product shipment, is monitored in our internal traceability program and information of the transaction number, date, customer name, shipping information, country of origin, type of material, quantity and assay could be retrieved anytime.

No traceability issues related to the identification of counterparty and the origin of material over the supply chain were identified for the reporting year for both ASAHI METALFINE and Asahi Pretec.

Both ASAHI METALFINE and Asahi Pretec have established two types of confidential grievance mechanism.

#### **( i ) ASAHI Hotline**

The "ASAHI Hotline" allows all our group employees including overseas group companies to anonymously report organizational or individual concerns regarding violations on laws, corruption, human rights abuses including harassment, etc. It includes both internal and external contact points. The external contact point is at an external law firm to ensure the independency where anonymous reports are also accepted. On the other hands, the internal contact point is set up for prevention purpose which every employee could feel free to use. No disadvantage on reporting to both internal and external contact points shall be resulted. All reported cases shall be kept confidential.

#### **( ii ) Inquiry Form on our website (<https://www.asahimetalfine.com/en/contact/>)**

An external reporting point on our website that can be used anonymously by internal and external stakeholders for any concerns or issues related to "Responsible Precious Metals Management" has been established. Whenever senior management receives a grievance, it shall set up an investigation team composed of members in an impartial position.

No grievance related to concerns or identified risks over the supply chain was received for the reporting year

and there were no remaining concerns to be closed out for both ASAHI METALFINE and Asahi Pretec.

**1.4. Strengthen company engagement with platinum and palladium supplying counterparties and, where possible, assist platinum and palladium supplying counterparties in building due diligence capacities**

We have established a KYC procedure which is based on our RPM Policy and reviewed it regularly.

We communicate the Policy in writing to our counterparties/suppliers to obtain their understanding and consent to it. We request all our counterparties/suppliers to consent to the Policy in accordance with our KYC procedures.

In addition, we have published the newsletters to our counterparties/suppliers periodically explaining the importance of confirming they and their materials to be supplied have no connection with conflict, human rights abuses, money laundering, financing terrorists, corruption, fraudulent transactions, and non-compliance with environmental and sustainability legal requirements for both ASAHI METALFINE and Asahi Pretec.

**Step 2: Identify and assess risk in the supply chain**

**Compliance Statement with Requirement:**

ASAHI METALFINE has fully complied with Step 2: Identify and assess risk in the supply chain

**2.1. Identify risks in the platinum and palladium supply chain**

We identify risks of the material, location and counterparty/supplier in the supply chain of precious metals.

Our due diligence is carried out on a risk-based approach and follows our requirements as outlined in the Responsible Precious Metals Management Manual (the “Manual”) before entering any business relationship. We obtain the information on origin of material, nature of business, beneficial owners, financials and other information of our potential counterparty/suppliers.

We conduct risk assessment based on our risk categories. Risk level is distinguished by assessing the industry sector and nature of business, country of origin, quantity of supply, and systematically apply them to all our counterparties/suppliers. Both ASAHI METALFINE and Asahi Pretec collect such information through the KYC Form, shipping documents and credit research service, etc.

On the other hand, we define the Conflict Affected and High-Risk Areas (the “CAHRAs”) and the “Amber List” by establishing a Country/Region Score Table based on the criteria of Conflict, Governance, Human Right, AML-CFT and Sanction. We use several reliable and independent information such as the Heidelberg Conflict Barometer, the Fragile States Index, the Human Freedom Index, the KnowYourCountry Ratings Table, the EU CHARA List, the US/UK/EU/UN Sanction Lists, the Section 1502 of the US Dodd-Frank Act, the Financial Action Task Force (FATF) and the Office of the High Commissioner for Human Rights (OHCHR) for analysis. Moreover, the Sourcing Advisory provided by LBMA has also been taken into account when constructing our CAHRAs and Amber list. The Amber list includes countries that are not defined as high-risk but have a potential high-risk of conflict, governance, human rights and money laundering. These lists are reviewed quarterly by the Committee and approved by the Compliance Officer of ASAHI METALFINE. The CAHRAs and Amber list applies to both ASAHI METALFINE and Asahi Pretec.

According to the Manual, any transaction with counterparty/supplier or material originating from the countries listed on the CAHRAs and Amber list shall be approved by the Compliance Officer.

The Compliance Officer is responsible for monitoring and reviewing the effectiveness of our management system, and is required to report at least once a year the result to senior management. The Compliance Officer is required to report any information related to prohibited transaction or high-risk supply chain of

precious metals to senior management.

The Compliance Officer of ASAHI METALFINE reported the results of the due diligence for the reporting year ended March 31, 2025, to senior management in May 2025.

## **2.2. Assess risks in light of the standards of their supply chain due diligence system**

We assess the risks of our counterparties/suppliers and their materials in the supply chain of precious metals according to the material type-specific criteria we specify. In order to assess risks for our supply chain, we make use of several reliable and independent information providers. All risk assessments are conducted by the Business Division (Sales team) and/or the Committee members. Corresponding results are reviewed by the Compliance Officer and senior management.

We consider the following materials, locations and counterparties/suppliers as “prohibited transaction (zero-tolerance)”.

- Mined material
- Smuggled material
- Material that originates from or has been transported through the Democratic Republic of the Congo and nine surrounding countries listed in Section 1502 of the US Dodd-Frank Act (the “DRC and surrounding countries”)
- Counterparty/supplier located in the DRC and surrounding countries
- Counterparty/supplier or their beneficial owner listed in the antisocial forces or sanctions lists
- Counterparty/supplier that has connection with conflict, human rights abuses, money laundering, financing terrorists, fraudulent transactions, or environmental destruction

We consider the following materials, locations and counterparties/suppliers as “high-risk supply chain”.

- Material from an Intermediate refinery in CAHRAs
- Material that originates from or has been transported through CAHRAs
- Counterparty/supplier or their beneficial owner located in CAHRAs
- Counterparty/supplier in higher risk industry such as arms, gaming and casino industry, etc.
- Counterparty/supplier or their beneficial owner classified as PEPs
- Counterparty/supplier that has been known to have sourced gold from a high-risk country in the last 12 months
- Counterparty/supplier that has significant unexplained geographic routing from counterparty/supplier

When a high-risk supply chain is identified, the Business Division Manager in charge is required to implement further investigation in order to determine whether to terminate or continue the business relationship. Identified risks shall be reported to and approved by the Compliance Officer.

We constantly monitor all transactions which take place through the course of the entire business relationship and we conduct appropriate scrutiny and monitoring of the counterparties/suppliers on a periodic basis. Asahi Pretec monitors all transactions in the same manner as ASAHI METALFINE.

No zero-tolerance and high-risk supply chain were identified for the reporting year for both ASAHI METALFINE and Asahi Pretec.

## **2.3. High Risk Supply Chains**

We perform enhanced due diligence (EDD) for high-risk supply chain. Where EDD is triggered, we undertake an on-site visit conducted by competent in-house personnel, joint assessment team or external consultant, using the LPPM on-site toolkit for the reporting. An on-site visit is conducted before the start of business.

However, they can be conducted within 6 months of the start of business on the condition that an in-advance approval is obtained from the Compliance Officer. In the event of unavoidable circumstances such as overseas travel restrictions or a pandemic, we can alternatively conduct web meetings and remote on-site audits. An on-site visit for a high-risk supply chain is conducted at least every 3 years.

For the intermediate refiners with high-risk supply chain, they are required to perform their supply chain due diligence procedures in line with the OECD guidance and obtain an independent third-party assurance on their supply chain due diligence. They are also required to be provided a government-issued identification of their representative and beneficial owner.

As no counterparties/suppliers required to be conducted an EDD were identified for the reporting year, both ASAHI METALFINE and Asahi Pretec did not undertake on-site visits during the reporting year.

#### **2.4. Monitoring of transactions**

Both ASAHI METALFINE and Asahi Pretec conduct appropriate scrutiny and monitoring as part of our ongoing customer due diligence procedures and undertake KYC updates and compliance checks on a periodic basis.

#### **2.5. Recognition of other certifications to demonstrate compliance with the due diligence requirements**

ASAHI METALFINE is a Code of Practices certified member of the Responsible Jewellery Council (RJC) since July 2019 and has been certified for the RJC Chain of Custody standard since July 2021.

#### **2.6. Continuously monitoring of risk management**

The Compliance Officer is responsible for monitoring and reviewing the effectiveness of our management system, and is required to report at least once a year the result to senior management. The Compliance Officer is whenever required to report any information related to prohibited transaction or high-risk supply chain of precious metals to senior management.

The Compliance Officer of ASAHI METALFINE reported the results of the due diligence for the reporting year ended March 31, 2025, to senior management in May 2025.

### **Step 3: Design and implement a management strategy to respond to identified risks**

#### **Compliance Statement with Requirement:**

ASAHI METALFINE has fully complied with Step 3: Design and implement a management strategy to respond to identified risks

#### **3.1. Report findings to designated senior management**

The Compliance Officer is responsible for monitoring and reviewing the effectiveness of our management system, and is required to report at least once a year the result to senior management. The Compliance Officer is whenever required to report any information related to prohibited transaction or high-risk supply chain of precious metals to senior management.

#### **3.2. Devise a strategy for risk management of an identified risk by either (i) mitigation of the risk while continuing to trade, (ii) mitigation of the risk while suspending trade or (iii) disengagement from the risk**

ASAHI METALFINE and Asahi Pretec determine the acceptance of the materials according to our internal management system as follows;

- (a) We shall immediately terminate business relationship with counterparty/supplier if any prohibited transaction is identified.
- (b) When a high-risk supply chain is identified, we shall suspend the transaction and conduct enhanced due diligence in order to determine whether to terminate or continue the business relationship. We continue the transaction if we are able to mitigate the risk. We shall terminate the transaction if we are unable to mitigate the risk.
- (c) When any doubt or concern of prohibited transaction or high-risk supply chain is identified, we shall suspend the transaction and conduct necessary investigation in order to determine the risk level. We shall continue the transaction if any doubt or concern of risk is not identified as the result of confirming the risk level.
- (d) Even if the transaction is identified as not high-risk supply chain, we shall mitigate the risk when any concern of negative impact on the supply chain is identified.

No instances to be reported to local government authorities were identified during the reporting year for both ASAHI METAL FINE and Asahi Pretec.

No relationships were suspended, cancelled or mitigated for the reporting year for both ASAHI METAL FINE and Asahi Pretec.

### **3.3. Monitor the improvement plan when a strategy of risk mitigation is undertaken**

ASAHI METAL FINE and Asahi Pretec risk mitigation steps for high-risk supply chain are as follows;

- (a) Approach counterparty or supplier to obtain further information regarding the operation and development of AML-CFT, sustainability and ESG activities.
- (b) Based on the results of the required additional inspection, an improvement plan is established and the counterparty or supplier is required to implement the corrective action plan within a specified period.
- (c) If we determine that the counterparty or supplier has made good faith efforts to remedy the identified risk and has already mitigated the risk, we continue business relationship with approval of the Compliance Officer.
- (d) If we determine that mitigation action is required for the identified risk, we continue business relationship with approval of the Compliance Officer, subject to be provided that the supplier implements a corrective action plan with a reasonable timeline and objectives.
- (e) When mitigating the risk while continuing business relationship, the progress in implementing the corrective action plan shall be monitored and reported regularly to the Compliance Officer, and additional measures shall be implemented as necessary in accordance with the progress.
- (f) When the specified deadline arrives, we reassess the risk based on the progress and determine whether to continue or terminate business relationship.

No corrective action plan was implemented to be monitored for the reporting year for both ASAHI METAL FINE and Asahi Pretec.

### **3.4. Report findings to the Board Committee**

The Compliance Officer is responsible for monitoring and reviewing the effectiveness of our management system, and is required to report the result to senior management at least once a year. The Compliance Officer is required to report any information related to prohibited transaction or high-risk supply chain of precious metals to senior management.

### **3.5. Continuously monitor adequacy of risk management strategies**

Both ASAHI METAL FINE and Asahi Pretec conduct appropriate scrutiny and monitoring as part of our ongoing customer due diligence procedures and undertake KYC updates and compliance checks on a periodic basis.

The counterparties/suppliers defined as high-risk supply chain are reviewed annually and required to be approved by the Compliance Officer. The counterparties/suppliers defined as not high-risk are also reviewed on a periodic basis by the Committee. All counterparties/suppliers are reviewed on an event trigger basis, such as ownership change and adverse media identified.

#### **Step 4: Arrange for an independent third-party audit of the supply chain due diligence**

##### **Compliance Statement with Requirement:**

ASAHI METAL FINE has fully complied with Step 4: Arrange for an independent third-party audit of the supply chain due diligence

We engaged the services of the assurance provider, KPMG AZSA Sustainability Co., Ltd. and their Independent Assurance Report is attached hereto.

#### **Step 5: Report on supply chain due diligence**

##### **Compliance Statement with Requirement:**

ASAHI METAL FINE has fully complied with Step 5: Report on supply chain due diligence

Our compliance report for the reporting year and related assurance report are available on our website.

(<https://www.asahimetalfine.com/en/responsible-sourcing/>)

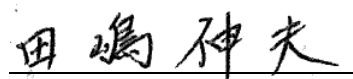

#### **Table 3: Management conclusion**

##### **Is the Refiner in compliance with the requirements of the Guidance for the reporting period?**

Yes. In conclusion, we implemented effective management systems, procedures, processes and practices to conform to the requirements of the LPPM Guidance, as explained above in Table 2, for the reporting year ended March 31, 2025.

#### **Table 4: Other report comments**

If users of this report wish to provide any feedback to us with respect to this report, they can contact our Compliance Officer on [certification@asahimetalfine.com](mailto:certification@asahimetalfine.com).
